DETAILED ACTION

Examiner acknowledges receipt of IDS filed 01/09/03, request for extension of time and response to election requirement filed 04/08/03.

It is noted that applicants in the response to the election requirement did not identify the claims that read on the elected species. It is respectfully requested of applicants to identify the claims that read on the elected species in addition to the species election. The election requirement is reiterated below.

Election Requirement

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Many pharmaceutical compositions are claimed where the dispersed substance or therapeutic agents are listed in claim 14.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 37 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1615

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A. Applicants must elect a specific disclosed pharmaceutical composition by elected a single dispersed substance or therapeutic agent from the list in claim 14.

B. Applicants must elect a single method for preparing the elected compositions. Applicants must elect the method of claim 21 or 22 to satisfy this requirement since the method of claim 21 differs from the method of claim 22.

C. Furthermore, applicants must elect a single method of treatment. The method of claims 37 and 35 differ from the method of claims 36. Applicants must therefore elect the method of claim 36 or 37 to satisfy this requirement.

In summary, applicants must elect a single disclosed pharmaceutical composition, a single method of preparing the elected composition and the method for treating a single disclosed disease condition (claims 37, 35 vs. claim 36) with the elected composition.

Applicants must list all claims readable on the elected disclosed pharmaceutical

Art Unit: 1615

composition, the method for preparing the elected composition and the disease condition for which the elected composition is administered to treat.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
